Manufacturing Simplified ERP Module

Streamline Your Factory Flows

Manufacturing Made Simple

Our Manufacturing Module for Chemical Industries, Metal and Reverse Assembly is a comprehensive solution that streamlines all aspects of manufacturing, from recipe formulation and production planning to quality control and cost analysis. With its robust features and industry-specific functionality, our module empowers chemical and assembly manufacturers to improve efficiency, productivity, compliance, and profitability.

Key Manufacturing Features

Work Order Management

Efficiently plan, schedule, and track work orders in real-time and with ease.

Bill of Materials

Accurately define and manage all components needed for your products.

Inventory Control

Optimize stock levels, track movements, and prevent shortages or waste of resources.

Transform Manufacturing Today

1. Recipe Formulation & Percentage BOM
2. Production Planning & Scheduling
3. Inventory Management
4. Quality Assurance & Compliance
5. Work Order Management
6. Traceability & Lot Tracking
7. Cost Analysis & Reporting
