

Smarter Decisions, Faster

The TDS-IBG Intelligent Decision Support System transforms executive decision-making from art to science integrating real-time enterprise data with advanced AI reasoning to deliver quantified, traceable, and defensible strategic choices.

THE COST OF DECISION LATENCY

Decision latency drains millions from enterprises so leaders lose time, visibility, and ability to see outcomes before committing.

THE C-SUITE DILEMMA

IBG-TDS turns enterprise data into real-time, AI-driven decisions—so leaders act with certainty when it matters most.

THE EXECUTIVE DECISION CRISIS

Blind Spots

Critical risks hidden in operating data.

Risk Exposure

Can't model decision outcomes pre-commit.

Slow Response

90-day lag from event to board action.

Over Load

40% exectime in unproductive status meetings.

67% of strategic initiatives fail due to poor execution visibility and late course correction

STRATEGIC DECISION ENGINEERING

For The Modern Boardroom

Real-Time Intelligence | AI-Powered Insights |
Defensible Decisions

A Message to Business Leaders

"In the modern enterprise, competitive advantage is determined not by who has the most data, but by who can translate data into decisive action fastest"

Traditional business intelligence gives you dashboards. The IBG-TDS Decision Support System gives you certainty.

Our partnership combines two decades of AI research with enterprise-grade ERP integration to deliver what every CEO demands: strategic clarity when it matters most.

Key AI Features

Decision Traceability & Governance

Complete audit trail with board documentation, performance tracking, and compliance reporting.

AI-Powered Strategic Advisor

Natural-language insights with automated analysis and risk-aware strategic recommendations.

Real-Time Decision Intelligence

Live ERP integration delivering predictive insights, AI forecasting, and instant executive visibility.
